

5. Which characteristic would help a plant survive in a playa wetland environment?
 - a. Can grow both on dry land and under water
 - b. Has orange flowers that bloom every two weeks
 - c. Is poisonous to both humans and animals

6. Due to irrigation of farms, increased water use in cities, and loss of playa wetlands, there is:
 - a. More water in the Ogallala Aquifer
 - b. Less water in the Ogallala Aquifer
 - c. None of the above

7. Which type of soil is most likely to be found in a playa wetland?
 - a. Sand
 - b. Silt
 - c. Clay

8. Have you ever seen or visited a playa wetland?
 - a. Yes
 - b. No
 - c. Unsure

9. Which source supplies the energy needed for the water cycle?
 - a. Sun
 - b. Soil
 - c. Electricity

10. To conserve playa wetlands, it would be best to:
 - a. Plant buffers around playa wetlands
 - b. Fill playa wetlands with topsoil
 - c. Dig holes into the middle of playa wetlands to make them deeper

Finished!
